AGRICULTURAL PRODUCTS

In the context of natural agriculture, sustainability refers to the successful management of agricultural resources to meet human needs, while simultaneously protecting or improving the quality of the environment and conserving natural resources for future generations. Therefore, sustainability in organic farming should be seen in a holistic sense that includes ecological, economic and social aspects.

As **BRB Tarım**, we established our **Obabeyi Farm** with the vision of protecting natural resources and future generations. Our mission is to expand our **Obabeyi Farm**, to ensure that future generations reach healthier foods, and to contribute to the ecological-economic life of our world and our country.
